Education

SCTR's Pune Institute of Computer Technology, Pune
Bachelor of Engineering in Computer Engineering

CGPA: 9.47
Sept 2023 – May 2027 (Expected)

Kedarling Highschool and Junior College (HSC)
Kadgoan, Maharashtra, India

MHT-CET: 99.525%, HSC: 83.17%
Feb 2023

Sou.V.D.Shinde Highschool (SSC)
Gadhinglaj, Maharashtra, India

Percentage: 96.60%
March 2021

Experience

In-House Intern – Emergency Healthcare System

Jan 1, 2026 – Mar 15, 2026

MERN Stack, Socket.IO, MongoDB, Geolocation

- Developed a centralized emergency healthcare platform to address delays in finding **ambulances, hospitals, blood, and critical medical resources**.
- Implemented a **one-tap SOS system** using geolocation to alert nearby **ambulances, hospitals, and volunteers** for faster emergency coordination.
- Provided **nearby hospital discovery, live ICU/Emergency/NICU bed availability, blood-bank search, and inter-hospital equipment sharing** through role-based dashboards.

Projects

Smart Attendance Monitoring System (*GitHub*)

- Collaborated in a team of four to develop an AI-powered attendance system using facial recognition and real-time video processing with OpenCV.
- Built a modular, responsive frontend in React.js with secure JWT-based login and seamless user experience.
- Designed and deployed RESTful APIs using FastAPI for efficient, asynchronous, and scalable backend communication.
- Integrated MongoDB to manage user profiles and attendance logs, and automated recordkeeping via Google Spreadsheet API.
- Enabled email notifications for absentees.

DevCollab (*GitHub*)

- Developed a dynamic platform allowing users to post projects and receive collaboration requests from interested developers.
- Implemented a profile-based approval system for project owners to accept or reject join requests.
- Integrated Socket.IO to enable real-time chat functionality for each project to streamline team communication.
- Designed RESTful APIs using Node.js and Express.js to manage users, projects, invitations, and chat messages.
- Utilized MongoDB for robust data storage of user profiles, project details, requests, and messages.

Achievements

- Achieved a **2-star rating** on CodeChef through consistent participation and problem-solving.
- Attained a LeetCode contest **rating of 1711**, demonstrating strong proficiency in competitive programming.
- Attained a perfect **10.0 SGPA** in the second semester, reflecting strong academic foundation and consistent performance.
- Selected among the **Top 100 Teams** in the **ZS Campus Beats Hackathon**.
- Participated in the **TechFesta Hackathon**, collaborating to develop an innovative software solution in a competitive environment.
- **Captain of College Kabaddi Team** – Secured **1st Rank** in the Intra-College Tournament.

Technical Skills

- **Programming Languages:** C++, HTML, CSS, JavaScript, SQL
- **Technologies:** Node.js, Express.js, MongoDB, React.js
- **CS Fundamentals:** DSA, OOP, DBMS, OS, CNS, REST APIs, JWT Auth
- **Tools/Platforms:** GitHub, Postman, VS Code
